

Team Cistel rides for a cure..... Team Cistel rides for a cure.....

Cistel Technology maintains a long-standing pledge to community involvement and is committed to building strong communities that embody the spirit of Cistel and its employees.

Team Cistel: *Together we ride for a cure*

Continuing with the tradition to give, on 20th October, four teams comprising five riders each congregated together at Ottawa City hall, to put their pedal to the metal in support of the 2006 Ride for Diabetes Research and to raise money for the Juvenile Diabetes Research Foundation (JDRF). In its 18th year, the Ride for Diabetes Research is a unique fundraising event where each of five members of a corporate team rides a stationary bike. The funds raised go toward JDRF's world-renowned research program, which has produced major scientific breakthroughs in the search for a cure for juvenile (type 1) diabetes, including islet cell transplantation and stem cell research.

Amidst loud cheering all the four teams collectively raised over \$5000.

Way to go Team Cistel!.....
